UNUSUALLY LARGE HEN EGGS.

A. J. Brooks, of 231 Henry street. yesterday brought to this office six of the ten abnormally large eggs taken from a hen which he killed and dressed. Each of these eggs are as large as a turkey egg, and on no one of them had the shell hardened. each being covered with a thick membrane-like surface of the conthem was broken in handling and exhibiting them. Evidently this accumulation of fully developed eggs, as far as size goes, is attribuble to the inability of the fowl to relieve herself of the unusually large ova.

ONE ASPECT OF THE LIBRARY PROPOSAL.

Whatever the prevailing opinion may be in regard to the erection of the proposed public library on the Memorial Mansion property, a point which was raised hele a few days ago by a well-known landscape gardener who hoped that it would not be done, it is a little late to broach this question. More than eight weeks have elapsed since the offer to the community by the three donors was made known, the council has consented to the use of the property and very material preparation have been made for the carrying out the project-all tion to the plan. Although the country club system In the Northern States has content. plated chiefly golf and other Summer sports the Circinnati playsround is to be a resort that can be enjoyed

GIRLS! LEMONS BLEACH FRECKLES

Make this Lemon Cream and just see Tan, Freckles Disappear

Mix the juice of two lemons with three punces of Orchard White, which any druggist will supply for a few cents, shake well in a bottle, and you have a whole quarter-pint of the most wonderful skin softener and complexion beautifier. Massage this sweetly fragrant lemon cream into the face neck, arms and hands, then shortly note the youthful beauty, softness and whiteness of your skin.

Farnous stage beauties use this harmless lemon cresm to bring that velvety, clear, rosy-white complexion.
also as a freckle, sunburn, and tan bleach becouse it doesn't irritate.—ad7

The smallest coin in Colonial Virginia was the "half-bit," about five cents. He thought we needed a coin for the hundredth of a dollar. Jefferson's one cent buys nothing much now but a postage stamp, but you only need to save enough of them, deposit them in the Commercial Bank at four per cent. and some day you will be well-to-do. A rebored job will not stand the gaff like a reground one but will soon be as bad as ever. The boring tool is bound

to follow the old hole and leaves little minute hills and hollows that must be worn down to a solid hearing and in doing so leaves too much clearance between the piston and the cylinder wall.

LET-US: PROVEIT

We would like to go over this proposition with you per-sonally, and show you the absolute proofs. Our equipment is especially built for regrinding work, including a Heald cylinder, grinding machine similar to that used by all the motor manufacturers that grind their bores.
